**DETAILED ACTION**

1. The amendment filed in Paper No. 6 (filed 8/21/03) has been fully considered and made of record.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over C. T. Hibbard (US 1,685,054) hereinafter '054.

The '054 teaches the claimed invention, including:

- providing a stator frame (Cf. Fig. 1, element 1),
- connecting many key bars (Cf. Fig. 2, element 5) with dovetail to stator frame,
- forming a stator core (Cf. page 2, lines 34 & 35) including:
  - forming a package of stator section laminations (Cf. Fig. 1, element 2; page 1, lines 25 & 26) to be coupled to stator frame through a dovetail slot (Cf. Fig. 2, element 5),

Art Unit: 3729

- forming another lamination to be inserted (Cf. Fig. 1, element 2) and coupled to the stator frame through another dovetail slot, except for pre-packaging stator core.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to pre-package the stator core for ease of manufacturing since it was known in the applicants' disclosure that pre-packaged stator core sections are old art (Cf. Applicants' disclosure, page 1, lines 25 & 26).

#### *Allowed Claims*

4. Claims 15-28 are allowed

#### *Response to Arguments*

5. Applicants' arguments filed 8/21/03 have been duly considered but they are not persuasive for the following reasons:

Applicants recite *inter alia* "... pre-packaged stator core... manually stacked stator core" (Cf. Claim 1) which is old art, as disclosed in the Applicants' specification (Cf. Page 1, lines 25 & 26). The Office's position states that the '054 teaches the claimed invention which reads on

Art Unit: 3729

Applicant's claimed invention, it would have been obvious to one of ordinary skill in the art at the time the invention was made to pre-package the stator core of two or more laminations to speed up the manufacturing process since it was known in the Applicants' disclosure that pre-packaged stator core sections are well known in the past.

### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.

Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Furthermore, the Patent Office saith not.
